For urgent and unplanned material needs, we can rely on our stockist partners. In this way, construction companies are ensured of an on-time supply without having to bear inventory expenses and avoiding surplus materials. Every project will be assigned to a project manager, who will follow the project's material requirements and the order from the beginning until the conclusion.

MATERIAL PLANNING

The project manager will generate a material acquisition plan.

ORDER EXECUTION

We monitor production schedules, expedite vendors, conduct inspection, review documentation and manage logistic requirements.
